SUMMARY

MCA student with hands-on experience in Artificial Intelligence, Machine Learning, Python, SQL, and data analytics through internship and academic projects. Experienced in predictive modeling, data preprocessing, EDA, and developing interactive dashboards using Python and Streamlit.

EXPERIENCE

AI/ML Intern 06/2024 – 08/2024
Meta-Fiser New Delhi

- Built stock price prediction models using Linear Regression & LSTM on time-series data
- Handled data preprocessing, EDA, and feature engineering using Python
- Developed an automated evaluation pipeline, reducing model evaluation time by **35%** and improving experimentation efficiency.
- Contributed to model tuning and visualization dashboards

EDUCATION

Master of Computer Applications (MCA), Computer Science 09/2025 – Present
Don Bosco Institute of Technology Delhi, DEL
Pursuing MCA with a focus on software development.

Bachelor of Computer Applications (BCA), Computer Science 10/2022 – 06/2025
Institute of Information Technology and Management Delhi, DEL
Graduated with a CGPA of 7.0 on a 10-point scale

SKILLS

Technical Skills
Python, SQL, Pandas, MongoDB, REST APIs**,** Machine Learning, LSTM, Predictive Modeling, Time-Series Analysis,, Streamlit

Data & Analytics
EDA, Data Preprocessing, Feature Engineering, Data Visualization, Business Analytics, Excel, Power BI, Tableau

PROJECT

Restaurant Payment System 08/2026 – 09/2026
Developed a desktop-based restaurant billing system using Python and Tkinter, featuring interactive menu selection, order management, automated bill calculation with taxes and service charges, a built-in calculator, and receipt generation.

StockLen-AI 09/2025 – 12/2025
Developed an interactive stock price prediction dashboard using Python, Streamlit, and LSTM models to analyze historical stock data, visualize trends, and forecast future prices, with data preprocessing and analysis using Python and Excel.

Task Management System 09/2025 – 10/2025
Built a modular task management app using Python, Streamlit, and SQLite with full CRUD support. Added a Pandas-based analytics dashboard for task tracking, with a clean, scalable architecture for future enhancements.

Chit-Chat 12/2024 – 02/2025
Developed a real-time chat application using the MERN stack, JWT authentication, React.js, and Socket.io , featuring secure messaging, a responsive interface, low-latency communication, and cross-device compatibility.
